

NURSERY VISIT TO THE POST OFFICE

After a walk in the vicinity, nursery was excited for their next outdoor visit. On 7th November 2017 nursery visited post office.

As we continue to evolve with crucial inventions such as the internet. We have made our world a very small place since we can converse with someone on the other side of the globe with just a click of a button.

On the contrary there are so many things we have lost touch with especially when it comes to our Postal Services; one of the reasons why it still exists today is because of vast and intricate channel which connects millions of people in India and around the world.

Before the visit we discussed how a letter travels from the post box outside our houses all the way to its destination.

The children made beautiful drawings and were given self-addressed postcards with messages the teachers wrote that they wanted to send to their parents and loved ones.

There was lot of excitement in the air as the Santa Marians boarded the bus holding their self-addressed postcards with a big smile.

As soon as the teachers and the children arrived they were warmly greeted by the Head Postmaster who explained the entire process that a letter has to go through before it reaches its destination including how all the letters arrive every morning in sacks and are sorted as per their pin code and then stamped and dispatched.

The objective was to give the children a 'hands on' experience and to help them understand how every unit needs to work as a single body to accomplish a common goal which in this case is to deliver the letters.

This gave our kindergarteners a glimpse into the busy work schedule of a postman.

Before heading back the youngsters eagerly lined up to stamp their postcards and personally drop it in the post box. They were very curious and excited at the same time in how thrilled their family would be when they receive their letters.

The visit to the post office concluded with a mind mapping session with our young minds discussing their observations. This close interaction of the children with everyone working in the post office enhanced the level of their awareness.

After coming back from the post office, children did the illustrative recall of the visit.
