

Walk in the vicinity

On 11th of October 2017, Nursery went for their first outdoor visit, 'A walk in the vicinity'. Children were informed about the visit during the circle time. There was excitement in the air as children were looking forward to experience something new. Their boundless energy and exuberance was evident in their loud farewell to the teacher's saying "hum toh ghumne ja rahe hai".

They enjoyed walking holding hand of their friends and exploring the new places in the neighborhood. The walk first led us to the neighboring farm. Children were excited as they saw different kinds of vegetable like cauliflower, green chilies, and fodder. We also saw fruits, plants, cows in the farm.

Children observed different trees, plants, and the farmland and were delighted to meet the farmers. Children enjoyed conversation with farmers and asked them as to what are they growing and how.

The cow shed was an interesting place as the children learnt about the living and eating habits of the cows.

Children said thank you to everyone in the farm and started walking on the green avenue lane. While walking, children carefully observed the traffic rules like, walking on the left and crossing the road only after looking both ways. The school guard and didi's watched out for the vehicles that passed by to ensure that children walked safely. Soon we all reached the St. Alphonsa's church, where children prayed for everyone's happiness.

Later we got together for photographs and enjoyed singing songs together. Stuti Aaradhna ... and Jeevan Jal, etc.

Soon this memorable walk came to an end. Children along with their friends started walking back towards school. After coming back to school they recalled their experiences through an illustration and one question “Ma’am hum ne goat to dekhi nahi!!!”

It was an enriching experience to walk on the road and visit places in our vicinity. It helped our children to connect to the world outside the school boundary.
