

## REPORT

It was on August 16, 2019 that KG-A along with KG-B went for exploring post office. Before going out teachers gave a brief introduction on what is Post Card, Letter Box, Post-Man, Mail Van, Stamps etc through flash cards so that kids have a better insight on what all vocabulary we use in Post Office and for what purpose they are being taken to the place. The Kids were excited as it was a new learning new experience to them. They enjoyed a lot in the bus

Once they reached the Vasant Kunj Post Office, teacher showed them Letter Box, its Red and Black color and also explained them why the timings are written on the letter box. Also, teacher showed the sign of post office (3 yellow curvy lines) so that children can recognize the post office in future as well.

Every child was handed over their post card on which they have drawn something at their own. Soon the children entered the post office where they saw various people working over there. They constantly observe everything without disturbing the staff. They were shown the rack where all the letters after segregation are placed. Now it's time to get the stamping done. Children were really excited as it was probably their first experience. Also the person who was sitting there explained why stamping is important.

The stamped post card was now in hands of children and they were gradually coming out of the post office. After coming out they dropped their cards in the letter box one by one. It was a knowledgeable experience for them.

After they are back from post office they illustrate their experience on paper very uniquely. The colors and the information is shown on paper in such a beautiful way.
